

Northport Climate Resilience Committee

Agenda

Wed Sept 23, 2026, 9:00 am

Northport Town Office

Updates

1. **Temple Heights culverts (MIAF Application)** -- expect to hear from DOT in October
2. **Bayview Park shoreline stabilization (CRP 5 update)**. Pre-construction meeting in early October, date TBD
3. **Solar** -- PUC update and next steps. It's still complicated, but now technically rather than legally. When we asked last week for approval, CMP re-iterated its earlier technical grounds for denial, which is attached. Danny seems to believe there is a straightforward solution.
4. **New Town office update** -- permitting, septic, and knotweed
5. **WCCAC**: Food security project (info from Pat, poster on Town Office bulletin board)
6. **Curry/Otis Climate forum**: (from Sue) Here's a link to a video of the climate forum with Chip Curry and Ryan Otis on 9/15/26. It was pretty interesting and might give us some ideas re Northport priorities. <https://youtu.be/6lSxjbriH80?is=AzovUTnMlwNSLnru>.

Actions

1. **CRP Round 6 updates and next steps** --
 - a. ScrapDogs Composting Pilot
 - b. FB Environmental Stormwater Assessment
2. **CRP Round 7 award and next steps** -- WCAP/MCOG energy efficiency collaboration
3. **This year's UMaine capstone project** -- A team of UMaine students chose our project for their civil engineering capstone this year, focusing mostly on transportation/safety in the Bayside Rd/Cross St/Route 1 triangle, but with a touch of resilience (checking two stream crossings for 100-year storm resilience). Full description attached. Site visit in October, date TBD. (One of the streams seems to have some eels in it, at least it did three weeks ago.)

New Business

1. **Pitcher Pond dam** -- info and update re: potential study of fish passage at the Pitcher Pond dam and two other dams in Knox County (Northport and Lincolnville Select Boards discussed at a recent joint meeting.)
2. Other?
3. Set date for next meeting
4. Adjourn
